## **Silver Predator Revises Springer Mining Lease and Option to Purchase Agreement**

**Reno, Nevada, February 9<sup>th</sup>, 2015: Silver Predator Corp. (TSX.V:SPD)** (the “Company”) announces that on January 17, 2015 it has executed a renegotiated Mining Lease and Option to Purchase Agreement (the “Agreement”) with Geological Services Inc. and Robert W. Schafer (the “Vendors”) on nine unpatented lode claims at its Springer Tungsten Mine and Mill property located in Pershing County, Nevada. This renegotiated agreement provides for a reduced royalty rate which will help the economics of the project.

### **The Agreement**

The Mining Lease Agreement, which is subject to TSXV approval, requires advance royalty payments to the Vendors totaling US \$500,000 over seven years, with annual payments of US \$100,000 commencing on the eighth anniversary as well as share payments totaling 300,000 shares over the first four years. All payments are to be credited against future royalty obligations. Springer may purchase the Leased property for US \$2,750,000, subject to a 1.5% NSR payable on all minerals, if paid prior to the 3<sup>rd</sup> anniversary. If paid after the 3<sup>rd</sup> anniversary but on or before the 5<sup>th</sup> anniversary, the payment will escalate to US \$4,000,000. If the purchase Option is not exercised, the vendors will retain a sliding-scale net smelter royalty (“NSR”) of 2.0% to 4.0% on tungsten and a 2% NSR on all other minerals. The previous agreement provided for a sliding scale 3.0% - 5.0% retained NSR.

### **Silver Predator Corp.**

Silver Predator’s corporate mandate is to advance its Springer Tungsten Mine and Mill Complex in Nevada to production through a joint venture arrangement. A PEA completed on current resources of 355,000 Indicated tons at an average grade of 0.537% containing 190,635 STU's of WO<sub>3</sub> and 1,933,600 Inferred tons at an average grade of 0.493% containing 952,326 STU's of WO<sub>3</sub> indicates an IRR of 47% after tax with an estimated capex of 29.8 million dollars<sup>(1)</sup>. The Springer facility was originally constructed and operated by General Electric Corp. in the late 1970’s and early 1980’s when the project was put on care and maintenance due to low tungsten prices. The mill was modernized by Golden Predator Corp. in 2007-2008. The facility could be production capable within 12 months of a capital commitment. Approximately \$100 million dollars has cumulatively been invested by all companies in the construction and modernization of the mine and mill.

The Company also holds the Taylor silver-gold project in Nevada. The Taylor project hosts a current

resource estimate<sup>(2)</sup>, is open to expansion, and is located in a district that has identified the potential for discovery of additional silver and gold deposits.

Mr. Mark C. Shutty, CPG, a Qualified Person as defined by National Instrument 43-101 and a consultant for the Company, has reviewed, verified and approved disclosure of the technical information contained in this news release.
