## **Silver Predator Appoints Thomas Chadwick to Board of Directors**

**Toronto, Ontario, May 20<sup>th</sup>, 2016: Silver Predator Corp. (TSX.V: SPD)** (the “Company” or “Silver Predator”) is pleased to announce that Mr. Thomas H. Chadwick has been appointed to the Company’s Board of Directors. Mr. Chadwick currently serves as the Vice President of Exploration for the Company.

Mr. Chadwick is a Certified Professional Geologist with over 30 years of mineral exploration and production-related mining experience. A graduate of the Geoscience Program at the University of Arizona (BSc), Mr. Chadwick also conducted post-graduate studies in geology at the University of Montana. Mr. Chadwick has worked as an independent consultant both domestically and internationally for clients that include Placer Dome, AngloGold, Barrick, and Eurasian Minerals and has a reputation for excellent field mapping skills within the Western United States exploration community. Mr. Chadwick has been instrumental in a number of discoveries during his career, including the Montanore deposit in Northwest Montana and the Hollister Mine in Nevada. His work has been published in many venues, including the Geological Society of America (1995), Economic Geology (1996), Mineralogy and Petrology (1997) and the Nevada Bureau of Mines and Geology (Santa Reina Fields 7.5' map, 2006).

### **Silver Predator Corp.**

Silver Predator owns the Springer Tungsten Mine and Mill Complex where the current mineral resource estimate<sup>(1)</sup> is 246,117 Indicated tons at an average grade of 0.43% containing 106,113 STU's (short ton units) of WO<sub>3</sub> (tungsten trioxide) and 1,768,968 Inferred tons at an average grade of 0.48% containing 852,884 STU's of WO<sub>3</sub>. The Springer facility was originally constructed by General Electric Corp. in the late 1970's and was operational for a few months in the early 1980's and then due to low tungsten prices the project was put on care and maintenance. Golden Predator Corp. modernized the mill in 2007-2008.

The Company also holds the Taylor silver-gold project in Nevada. The Taylor project hosts a current resource estimate<sup>(2)</sup>, is open to expansion, and is located in a district that has identified the potential for discovery of additional silver and gold deposits.

Mr. Michael Maslowski, CPG, a Qualified Person as defined by National Instrument 43-101 and a consultant for the Company, has reviewed, verified and approved disclosure of the technical information contained in this news release.
